

The “Jersey Boot” TM. is a new patent pending multipurpose breaching tool that was created by the Jersey Tactical Corp. The Jersey Boot was, designed out of necessity and extensive field experience. Thus it is made by breachers for breachers. It is 100% made in the USA using nothing but 100% USA steel for its construction. The Jersey Boot simply stated is “Made by the American Worker for the American Warrior” TM. It was designed for 20 plus uses one greater than the next. The Jersey Boot is the first tool of its kind that has been able to cross over into all fields. The tool is applicable for fire, rescue, Swat, Military, active shooter, and police/first responder operators.

The Jersey Boot weighs in at 25 lbs with no moving parts and a lifetime warranty on the striking head under human use. It is 26” over all in length and allows the operator to complete countless maneuvers in tight quarters. It truly is a CQB breaching/rescue tool.

The operator will no longer have to search for multiple tools for breaching and or emergency circumstances. This one tool replaces rams, rakes, pry bars, sledge hammers, bolt cutters, hydraulic spreaders, steps, axes, and many other tools. It has 20 plus uses and no moving parts. The following are a few of its multiple uses. Traditional ram, height differential ram, CQB ram, prying action, fire axe, digging tool, lock busting, chain busting, a step, and there are 10 more additional uses available on the tool itself.

A video of the Jersey Boot in action can be viewed by searching Jersey Boot via www.youtube.com or www.Blutube.com . For more information about the Jersey Boot please go to www.jerseytactical.com or call (908) 995-2700. All Jersey Boots are delivered to the end user with a 20 page instruction manual. This 20 page manual can be located in a PDF file via www.jerseytactical.com by searching products then click on the info bar below the Jersey Boot icon.
